The organization hates and fears "Zeke" de Baca.

This hatred and fear are the greatest recommendations De Baca has among the people polished courtesy, and has demonstrated that he is one of the greatest vote getters on his own marits in the of New Mexico.

No greater compliment to "Zeke's" character could be paid than the statement of Charlie Spiess on a historic occasion that "Zeke", the lieutenant governor, was the specter in the road of a Republican attempt to get Governor McDonald off the right-of-way of the G. O. P. Juggernaut by impeachment.

The Republican machine and the Invisible Government and the Plunderbund feared to have De Baca governor then.

Now the Whispering Gillenwater Prevarication Bureau is getting insomnia trying to

head off the election of Zeke de Baca. First, it tells the public De Baca is mortally ill and can never live to be elected. De Baca electrifies the state with the vigor and sledge hammer effectiveness of his campaign.

The Prevarieation Bureau then tells us that De Baca is an "impossible candidate"; that the native people won't vote for him, that the English-speaking people won't vote for him, that the English-speaking people won't vote for him, that his own county of San Miguel won't vote for him and that he won't get to first base.
